

GAT DIRECT.Connect

System Integration for GANTNER devices

FACTS AT A GLANCE

- Allows multiple GANTNER devices to connect with third-party software via a single public IP address
- Ideal for integration with cloud-based services.
- Third-party software independent of operating system - GAT DIRECT.Connect runs on Microsoft Windows
- Selectable logging of system communication within GAT DIRECT.Connect in text files
- Included JSON adapter uses logic-independent JSON data format
- Only one JSON adapter required for communication with all GANTNER devices
- Custom adapters available
- Different adapters can be used in parallel

GAT DIRECT.Connect is an innovative solution for the integration of GANTNER products with third-party software, e.g., management software used in fitness studios or authorization management software for access control. GANTNER devices and the GAT Writer integrate exclusively via GAT DIRECT.Connect.

GANTNER devices communicate with third-party software via GAT DIRECT.Connect and an adapter, thereby simplifying the process of integrating GANTNER devices with third-party software. The intelligent communication management allows devices to be controlled via a cloud-based service as well as in the local environment.

Depending on the system, customised adapters can be developed (e.g., web service adapters) to suit different requirements. GANTNER provides a programming language independent adapter that uses the Java Script Object Notation (JSON) format.

Minimum System Requirements

CPU:	IBM compatible PC, e.g. Intel Core i5, 3 GHz or comparable CPU, min. 1 GHz
Main memory (RAM):	Approx. 1 GByte (reserved for GAT DIRECT.Connect)
Disk space:	min. 600 MByte free disk space up to 20 GByte - 2 A bei 24 V
Network:	NIC for TCP/IP network (IPv4 only)
Software:	.NET Framework 4.5 (included in the GAT DIRECT.Connect installation package)
Operating systems:	- Microsoft Windows 10® Pro, Enterprise ¹⁾ - Microsoft Windows Server 2016® Standard, 64-bit - Microsoft Windows Server 2019® Standard, 64-bit

¹⁾ Editions not listed, such as Mobile, IoT, etc. are not supported

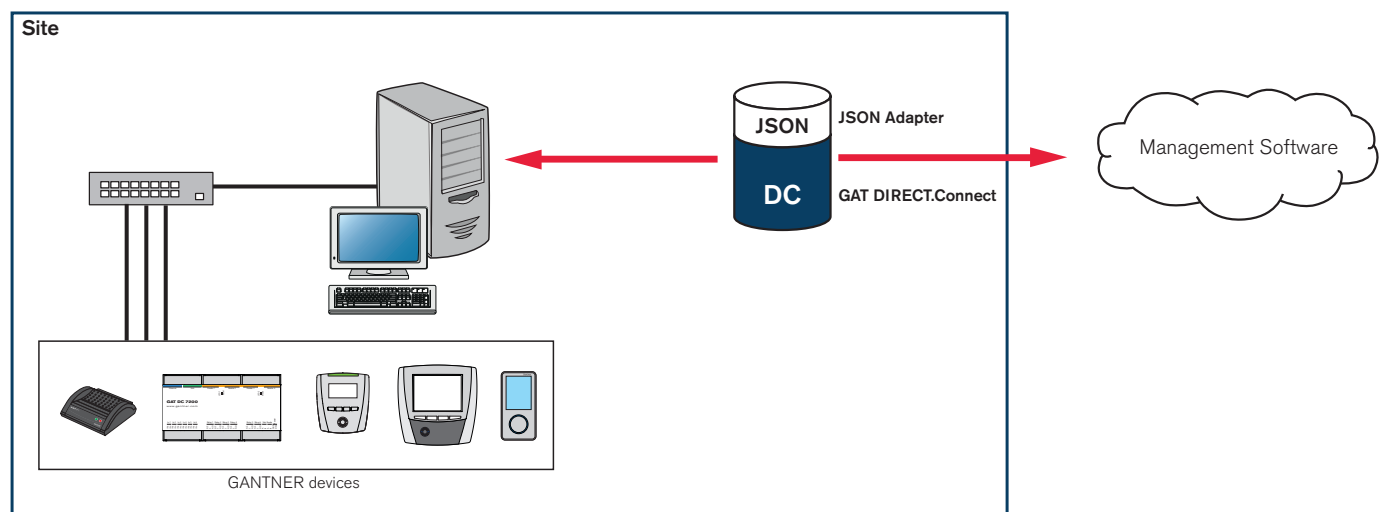

Small Business Server is not supported.

Unless noted otherwise, 64-bit versions of the listed operating systems are supported.
Always use the latest service packs.

NOTE!

- Any additional licences required, e.g., for the operating system or for database requests, must be provided by the customer.
- Before ordering, please ensure that all devices (terminals) intended for use in a system are compatible.
- The hardware requirements vary depending on factors such as the number and type of GANTNER devices in a system, or the type of adapter used for communication.

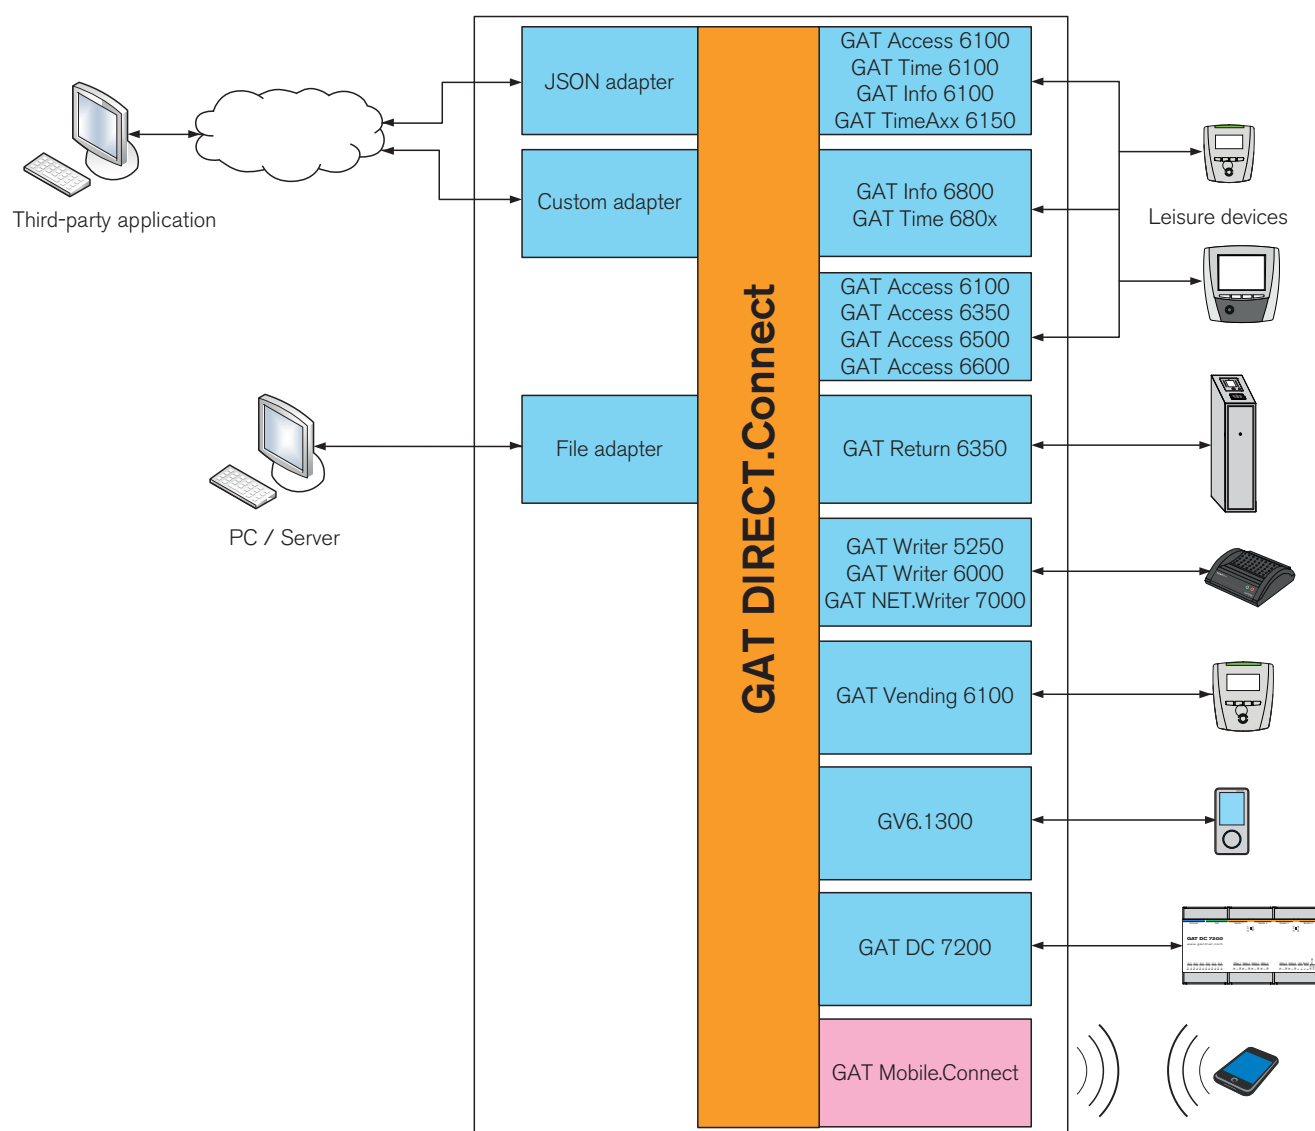

Typical Application

Order Information & Accessories

Description	Part No.
GAT DIRECT.Connect Basic Licence Software for controlling GANTNER leisure terminals and readers via third-party software. Basic licence.	789238
GAT DIRECT.Connect MBO Adapter	911124
GAT DIRECT.Connect Virtualgym Adapter	959536
GAT DIRECT.Connect FIAS Adapter	1100674
GAT DIRECT.Connect Fink Adapter	1101869
GAT DIRECT.Connect REST Adapter	1106689
Service adapters for connection to various third-party software packages.	

Integration Example

**NOTE!**

If the DIRECT.Connect service stops operating, e.g., when the computer is shut down, the connected devices do not have an online connection and switch to out of service mode depending on the configuration.
